# JACE 8000
IO R

Introducing an IO solution that makes the next-generation JACE® 8000 more powerful, and your migration path straightforward.

DESIGN SIMPLICITY, TECHNICAL SOPHISTICATION AND MORE, IN BOTH A 16 AND 34 POINT MODULE

- **Ease of use:** Single-tool programming inside the Niagara environment with live debugging

- **Enhanced capability:** Ability to set hold time and default states for outputs based on application needs

- **Improved flexibility:** Operates over an RS485 network and can be installed anywhere. Multiple modules can be combined so each JACE 8000 can command more than 250 points of IO.

- **Minimal wiring labor:** Quick three-step process when moving from NDIO to the JACE 8000

MIGRATION MADE EASY

1. Detach from JACE® 2, 3E, 6 or 6E's T-IO-16 and T-IO-34 modules

JACE 8000 IO R is a drop-in replacement for legacy T-IO-16 and T-IO-34 modules

2. Reattach to JACE 8000 IO R 16 and 34 modules

Same footprint makes the JACE 8000 IO R an ideal retrofit for JACE 2, 3E, 6 or 6E

3. Add 24VAC/DC and connect the RS485 bus to the JACE 8000

ACT NOW

- **Available incentives:** <Contact> about available IO R incentives.

- **Continued support:** JACE 3E and 6E service parts will be available for a limited time.

This latest Niagara Framework® advancement opens a world of possibilities
